How to take care of your gilt brass jewelry

To best protect your gilt brass jewelry and to maximize their lifespan, try and avoid wearing them in the following cases:

- in the shower
- at the pool
- at sea
- at the gym/working out or when you sleep
(sweating increases metal oxidation)

Jewels do not support contact with cleaning products & chemicals, perfumes & body lotion (wait until your skin is completely dry before putting on your jewelry).

Last but not least, carefully store your jewelry when you are not wearing them.
